Product Life Cycle Policy

The normal product life cycle of Bridgetek's microchips is in excess of 5 years. When it comes to end of life, we will follow the BRT IC Product End of Life Policy (Document No: BRT_000374).

A reduced product life cycle may occur if the technology or processes used in the manufacture of a particular device becomes redundant at the semiconductor foundry. In this exceptional case Bridgetek will analyse the market potential to determine if there is a case to develop a compatible replacement product.

This Product Life Cycle Policy supersedes any previous Bridgetek Product Life Cycle Policy as of the date of release indicated above.

On behalf of BRIDGETEK Pte Ltd,

Fred Dart, CEO
BRIDGETEK Pte Ltd.
