1 Introduction

This Technical Note shows examples of Bridgetek IC PCB footprints which can be used as a guide for creating your own PCB footprints.

The IC footprints in this document are sourced from various Bridgetek hardware such as development modules and demo hardware, using the most common and cost effective package types.

Most Bridgetek IC footprints are included in this document; however some are missing when a package type has not been used for specific Bridgetek hardware. See Table 1.1 for unavailable footprints.

The IC footprints in this document provide:

- A 1:1 scaled IC footprint
- An annotated IC footprint showing some key measurements

All dimensions shown are in millimetres (mm).

Additionally, a range of IC solutions from Bridgetek are available through AltiumLive.

To view Altium files, you need either the full version of ‘Altium Designer’, or ‘Altium Viewer’ which can be downloaded for free from Altium’s web site.

Note that all IC footprints may not be available through AltiumLive. Please contact Bridgetek in this case.

1.1 Scope

These IC PCB footprints can be used as a guide to create your own IC PCB footprints with particular PCB design tools other than Altium.

Please refer to the IC datasheet for full IC package parameters.

Note: No guarantees can be provided in this document. These can be used as a guide only.

Note: Bridgetek modules are recommended for product test and development prior to custom hardware development.

1.1.1 Unavailable Footprints

Table 1.1 shows that there is one footprint not included in this document as, for example, it has never been used for specific hardware developments within Bridgetek. Other package options are available for this product family and are included in this document.

Note: This is correct at the time of writing and newer products may not be included.
